Skills

- ❖ Programming Language – Java, C
- ❖ Operating System – Windows, Kali Linux
- ❖ Vulnerability Assessment and Penetration Testing – Nmap, Metasploit, SQL Map, Nessus, Burp Suite, Harvester, Shodan , Hydra, Burp Suite, Wireshark , Google hacking database.

Education

- ❖ Computer Science Engineering| Parul University, Vadodara   CGPA: 7.18 | (Sep – '21 – Present)
- ❖ Industry Embedded Program | Quick Heal Academy   (Dec- '21 – 25)
- ❖ XII (RBSE) | Saraswati Vidhya Mandir , Behror   90.60 | 2021

Projects

- ❖ **Bank Management System using Java and MySQL**
  This comprehensive Bank Management System project, developed using Java and MySQL, offers a streamlined account management process with a focus on user-friendly ATM functionality. The system incorporates a three-step account opening process and provides account holders with a secure and efficient means of accessing various banking services.

- ❖ **Multi-Departmental-Networking-with-Enhanced-Security-in-Cisco-Packet-Tracer**
  This Cisco Packet Tracer project presents a sophisticated enterprise network infrastructure employing classless addressing, featuring dedicated servers for key departments such as Engineering, Sales, and Accounts. The project is designed to optimize efficiency, bolster security, and ensure controlled communication within and across departments.

Experience

- ❖ CTF Player at TryHackMe   (Top 10%) | (Oct- '22 – Present)
